

DISCOVER THE FOUNDATIONAL KNOWLEDGE
NEEDED FOR COLLISION REPAIR WITH THE NEW
HEAVY DUTY TRUCK
TRAINING PACKAGE WITH I-CAR®!

I-CAR, the Inter-Industry Conference on Auto Collision Repair, was founded in 1979 and is an international not-for-profit organization dedicated to providing the information, knowledge and skills required to perform complete, safe and quality repairs.

I-CAR's Heavy Duty Truck Special Package includes training from I-CAR's existing automotive collision repair courses that were packaged specially for the heavy and medium duty truck industry, where similar materials, systems and methods are utilized to provide guidelines that contribute to complete, safe and quality repairs.

Introduction to Diagnostics and Scan Tools provides the student with an introduction to the various safety system technologies found on today's cars and the importance of performing pre- and post- repair scans.

Damage Analysis of Unitized Structures – Front is designed to provide an understanding of the inspection items for the front exterior body panels and repair and replacement considerations for the parts of the front unitized structure.

Damage Analysis of Unitized Structures - Center is designed to provide an understanding of the structural damage analysis methods and repair and replace considerations for the center section of a unitized structure.

Damage Analysis of Unitized Structures - Rear is designed to provide an understanding of repair and replace considerations for rear exterior items, and the rear of the unitized structure.

Introduction to Plastics and Single-Sided Repairs provides an overview of the different types of plastics used for vehicle construction, their physically identifiable characteristics, and single-sided repair considerations.

Introduction to Two-Sided Plastic Repair helps students identify a two-sided repair, lists the steps required, and considerations when performing a two-sided plastic repair.
